

INTEGRA SYSTEM

Future evolution line

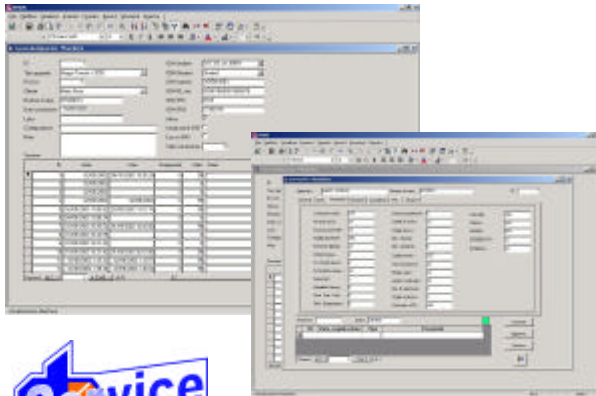

Top-scale

Everything that a weighing system can do control, programming, auto-testing and GSM interface for total remote control. Integration with SERVICE network able to dialogue with the other intelligent part of the machines.

DINA-SERVICE

More security and peace-of-mind in correctly using and fully exploiting all the many services offered by INTEGRA thanks to a constant remote connection with DINA-SERVICE, the software that manages a complete program for troubleshooting and service for the entire INTEGRA SYSTEM (including all the part dedicated to hydraulic controls).

DINA-PALM

Wireless hand-held control unit the integrates all the main work functions of the weighing system and all the hydraulic devices on the machines. Handy to use and to carry thanks to small dimensions and innovative technological design. Easy to use thanks to a clear operator interface on a graphic display.
